

## Carving the Corner Medallion

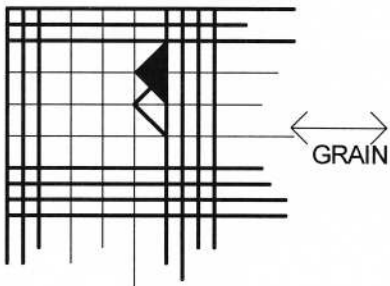

Step 1

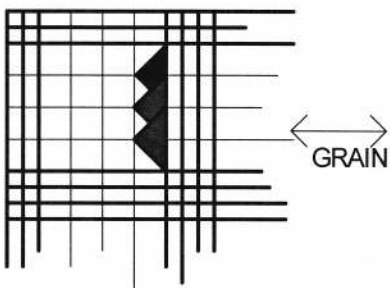

1. Start by carving a three-sided chip, cross grain (base of the triangle not with the grain), in one corner.
2. Make the second three-sided chip overlapping the first.
3. Carve the third triangle to complete the side.

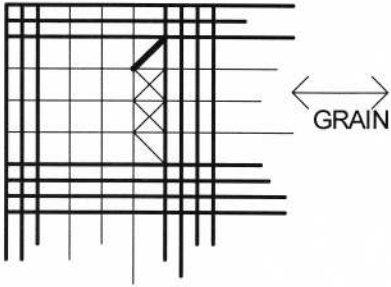

Step 2

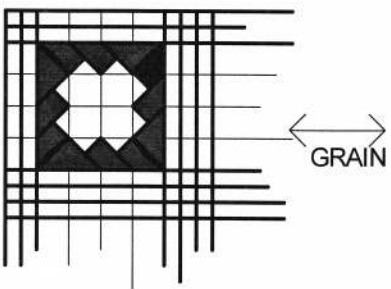

Step 3

Step 4

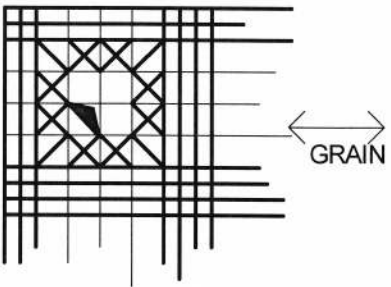

Step 5

4. Before carving the second side, make the last cut for the fourth side. This is to prevent the border between the last chip and the first chip from breaking out.
5. Complete the next three sides to leave scalloped square.
6. Start a three-sided chip slightly off center to start the center cross.
7. Complete three more identical chips, each just off center moving around the center.

Step 6

Step 7
